

Tetragon

Lolium perenne (Tetraploid)

Benefit from genetic improvement times four

Tetragon is the fastest and most reliable option for germination in both early spring and late autumn, with unparalleled disease resistance. The resistance against snowmould of **Tetragon** is undoubtedly achieving high scores. The winter aspect shows incredible performance with a nice green colour which is the lightest green of a tetraploid variety available on the market at the moment. This variety's outstanding quality is its exceptional tolerance for wear. This is a top-tier sports variety. **Tetragon** is the perfect choice for professional and semi-professional sports mixtures. Its fast germination makes it perfect for overseeding.

Tetragon will improve your mixture – you can count on it.

Very nice colour and good winterhardiness
